

Keeping safe with your High Visibility Vest

As with other clothing, high visibility vests can wear out over time. If the vest begins to fade or becomes damaged in any way then it is time to obtain a new vest.

Wearing your vest :

- Fasten your vest in the front
- Make sure all of your vest can be seen (try not to cover or obscure any of it with a back pack or satchel)
- Replace the garment if permanently stained or faded or otherwise damaged.

To make sure that your vest provides the best level of protection always keep your vest clean. Follow these laundry care guidelines :

- Do not iron directly on the reflective tape
- Do not tumble dry or dry clean
- Do not wash in biological powder
- Do not use bleach on the vest
